

UNLOCK...with More Precautions

It's more than five months and we are yet to see any sign of relief from the pandemic - Covid 19. The unlock has begun and situation getting normalised but the numbers of people getting affected is growing day by day which is a serious concern. The contentment of this virus seems impossible until proper vaccine comes out. What we can do and at Lactalis India we are doing is treading cautiously. We know we can't go lose during this unlock and hence following all the protocols we set for ourselves, our employees and channel partners and at the plant. We are ensuring that nothing will go wrong and we will be there at the service of our customers with committed quality and hygiene.

Safety of Our People

Safety precautions of employees, at the entrance, meeting rooms and other office areas.

Serving the society
